8

Profilers med en spesiell sammensetning

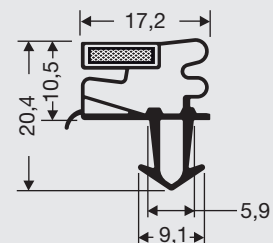

Tilgjengelig som ramme eller profillengde.

Profilers med -MS i navngivningen er laget av en spesiell P.V.C.-oppskrift sammensatt av behandlet gummi. Takket være denne spesielle sammensetningen, forblir disse profilene fleksible opp til -30 grader Celsius. Disse profilene brukes ofte i kjølebenker, hurtigkjølere og fryserer med lav temperatur.
